INTEGRATED HYGIENE & SANITATION SOLUTIONS

Choosing an integrated service solution with Sanitech enables you to consolidate all your key outsourced needs through a single trusted provider. By partnering with us, you benefit from streamlined management and delivery of a comprehensive range of services tailored specifically for your site.

This centralised approach gives you greater oversight and control, simplifies vendor management, and helps standardise costs, ensuring improved financial oversight.

Furthermore, our integrated solution offers the convenience of a single, consolidated invoice, making financial reconciliation effortless.

By utilising on-site personnel for soft services, we minimise the number of external contractors accessing your premises, reducing security risks and guaranteeing service delivery is completed and verified by our dedicated on-site team.

TOILET HIRE

Sanitech offers South Africa's largest fleet, with over 30,000 ready-to-use units available through 20 national and African branches. With the widest variety of units - from executive to basic - we meet every need, anywhere: events, construction sites, or even underground mining. We're equipped to go the distance, wherever you are.

SPECIAL EVENTS

Having reliable portable toilet solutions at special events is essential for a successful experience. Event organisers and planners trust Sanitech for top-quality products that combine innovative design, outstanding performance, and full compliance with environmental and health regulations. With a wide selection available at competitive prices, Sanitech delivers sanitation solutions tailored to every event's needs.

COMPLETE PORTABLE SANITATION & WASTE MANAGEMENT

MINING SECTOR PORTABLE TOILET SYSTEMS

A fully self-contained, freestanding portable toilet with its own water supply - no cables, pipes, or power needed. The nano-coated rotating bowl resists debris and makes cleaning easy, while a removable canister ensures hygienic waste disposal with minimal spill risk, protecting users, the environment, and service staff.

KHUSELA DRY SANITATION UNITS

Our innovative retrofit upgrade transforms traditional ventilated pit latrines, making them safer and more hygienic. The key feature is a durable, adaptable “bladder” system that fits various pit sizes and holds up to 2,000L of waste, preventing environmental contamination. This system solves key health, safety, and maintenance challenges found with open pit latrines.

SEPTIC PUMP SERVICES

Sanitech provides comprehensive pump-out services, including the maintenance and management of septic tanks, portable toilets, pit latrines, mobile ablution units, and conservancy tanks. With a robust fleet of over 30,000 rental units and 220 service vehicles, we are fully equipped to deliver prompt and reliable solutions nationwide, ensuring fast and efficient service wherever you are.

WASTE WATER TREATMENT

Sanitech provides fast-deploying, fully re-deployable wastewater treatment solutions. Our modular and mobile treatment plants are designed to convert domestic wastewater into reusable water, ideal for agricultural irrigation or recycling in industrial processes. Additionally, these systems can be configured to treat wastewater to potable water quality standards when required.

EXPERIENCE SEAMLESS SITE MANAGEMENT WITH SANITECH

HYGIENE WASHROOM SOLUTIONS

Sanitech provides high-quality, durable hygiene solutions - including sanitisers, wipes, dispensers, sanitary bins, and hand washing systems - in a range of stylish finishes to suit any interior. We offer free installation and ongoing maintenance of all units for the length of your contract.

DAILY CLEANING SERVICES

Cleaning isn't your core business. By appointing Sanitech as your integrated service partner, you get all essential outsourced services from a single provider - delivered directly and tailored to your needs. This streamlines management, standardises costs, and ensures financial oversight, letting you focus on your core business while we handle the rest.

RECRUITMENT

All Sanitech employees are subject to an entrance medical and fingerprint criminal background check prior to recruitment. Preference is given to people from the local surrounding areas to ensure attendance optimisation and community upliftment. All staff are required to be literate and competent in verbal and written communication.

MANAGEMENT & SUPERVISION

Staff will be managed and supervised on a continual basis through on-site supervision/ management. Area Manager/ Key account manager will visit on a weekly basis.

TRAINING

All staff appointed undergoes in-house company policies and procedure overview training, on-site safety requirements and inductions, best cleaning practises and HACCP cleaning principals. Equipment and chemical product training is provided by our approved suppliers in each region focusing on correct SOP's and SWi's for each product and service offered.

UNIFORMS

The work will be carried out by experienced personnel, clothed in clean and distinctive overalls whilst carrying out their duties. All required Personal Protective Equipment (PPE) has been made provision for and will be provided to each staff member based on the site requirements and responsibilities of the Sanitech Personnel on site.

EQUIPMENT & MATERIALS

Sanitech recognises its environmental, social, and economic responsibilities and applies practical solutions. We partner with approved suppliers of industrial cleaning equipment and chemicals who deliver reliable, innovative, ISO 9001/14001-compliant products aligned with our commitment to quality, service, and value.

MEMBERSHIPS

SPECIALISED CLEANING

Sanitech specialised cleaning delivers tailored contractual and project-based services for complex cleaning needs, including high-rise cleaning, floor stripping and sealing, and advanced carpet extraction and drying. As an industry innovator, Sanitech uses cutting-edge equipment such as diamond twister pads, water-fed pole systems, and eco-friendly carpet cleaning chemicals.

DEEP CLEAN SERVICES

Sanitech's heavy-duty cleaning teams use specialised chemicals to effectively remove stubborn buildups of body fats, grease, and grime. To prevent cross-contamination and bacterial spread, we follow HACCP-compliant, colour-coded cleaning protocols. All staff receive comprehensive training under our nationally standardised programme, ensuring consistently high hygiene and safety standards.

PEST CONTROL

INSECT CONTROL

Maintaining a pest-free workplace requires regular and comprehensive control of unwanted insects. Sanitech provides a tailored combination of treatments to effectively eliminate infestations. Our solutions include fumigation, misting, gel application, dusting, and targeted spraying. As part of our monthly service visits, we also apply surface spray repellents, install insect light traps, and service insecticidal aerosol dispensers, ensuring lasting protection for your premises.

RODENT CONTROL

Eliminating mice and other rodents from critical areas such as offices, refuse zones, and kitchens is essential to safeguarding your workplace from structural damage. Sanitech installs and routinely maintains tamper-proof rodent bait stations around your property's perimeter, providing ongoing protection and minimising potential risks associated with rodent infestations.
