SANI-SCENTECH

The Science of Scent. The Art of Luxury

Enhance Your Space -Elevate your senses -Experience quality

**Sani-Scentech Perfume Diffusers:
Dubai-Inspired Fragrances Created in France.**

Innovation Meets Luxury

FREE STANDING

DIFFUSION SYSTEM

Commercial scent diffusion systems provide effective and safe fragrance diffusion.

The advantage of the free standing or wall mounted dispensers model include quiet volume levels, unobtrusive operations, adjustable scent levels and zero residue in the air as well as minimum consumption rates. This range provides submicron diffusion technology which provides the most effective and safe fragrance diffusion for a scented space

- Small spaces
- Quiet and unobtrusive
- In case of challenging AC installation
- Tailor-made boxes if needed
- Hassle free service
- Interior design integrated

AIR CONDITIONING

DIFFUSION SYSTEM

The HVAC range of air diffusers allow even and precisely controlled scenting of any site area from small retail shops to a large shopping mall all the way to an airport via the ducted air conditioning and can be used for both scent marketing and odour control.

- Extremely Powerful
- Large areas
- Even Diffusion
- Hassle free service
- Clean Installation

DIFFUSERS SPECIFICATIONS

- Up to 150 Cubes
- 100 ml cartridge
- White / Black
- Standalone

W 5000 Diffuser

- Up to 6000 Cubes
- 1,200 or 2,500 ml cartridge
- 18x15x16 cm
- 18kg (empty)
- Black
- AC Installation

Liquid diffusion by nebulization is a proven technology, patented worldwide, uses no heat but transforms liquids into dry micro-sized droplets that behave like dry vapor and diffuse quickly in the air, either directly or through an HVAC duct network.
